

Avanza Español Accessibility Conformance Report

WCAG Edition (Based on VPAT[®] Version 2.5Rev, April 2025)

Name of Product/Version	Avanza Español v1.0 (Beta)
Report Date	September 30, 2026
Product Description	Avanza Español is a web application developed at Texas A&M University. It uses artificial intelligence to support Spanish language learning and proficiency assessment for educators pursuing bilingual certification and endorsement pathways (BTLPT preparation). It provides AI-generated practice and assessment in listening, speaking, reading and writing, including text chat with an AI tutor, vocabulary flashcards, grammar and reading quizzes, graded writing and speaking tasks, voice conversation, and progress tracking.
Contact Information	Dr. Rafael Lara-Alecio (Resource Owner), Educational Psychology, College of Education and Human Development — a-lara@tamu.edu Alternate: Dr. Beverly Irby — beverly.irby@tamu.edu Center for Research and Development in Dual Language and Literacy Acquisition (CRDLLA), Texas A&M University
Notes	This report covers the authenticated web application: navigation, Chat, Cards, Grammar Quiz, Reading, Writing (Opinion, Correspondence, Lesson Plan), Graded Speaking, BTLPT Oral Tasks, Voice and Progress. The Texas A&M CAS sign-in pages are operated by Texas A&M Technology Services and are outside the scope of this report. The "Listening" section is not yet released. Speech-based features. Voice, Graded Speaking and BTLPT Oral Tasks assess or practice spoken Spanish, so they require a microphone and the ability to speak. This is fundamental to evaluating oral proficiency. Text-based alternatives for practice are available in Chat and Writing, and accommodations are provided case by case. Voice speech recognition depends on the browser's Web Speech API (Chrome or Edge). AI-generated content. Prompts, feedback and tutor replies are generated by a large language model and rendered as plain text, lists and headings by the application.

Evaluation Methods Used

Evaluated by the development team in September 2026 against WCAG 2.2 Level A and AA (which includes all WCAG 2.0 and 2.1 A/AA criteria).

Methods:

- Source-code review of every user-facing screen and component (React front end).
- Automated testing with axe-core 4.10 (rule sets wcag2a, wcag2aa, wcag21a, wcag21aa, wcag22aa) in Chromium on every screen, including interactive states (quiz question and answered states, flipped flashcard, generated writing/speaking prompts), at 1280px, 375px and 320px viewport widths. Result: 0 violations.
- Scripted keyboard-only tests: skip link, navigation, flashcard flip and rating, quiz answering and focus management.
- Reflow check at 320 CSS px and the WCAG 1.4.12 text-spacing override test.
- Manual color-contrast calculation for all text and UI component colors.

Browsers: Google Chrome (current). Manual screen-reader testing (VoiceOver on macOS, NVDA on Windows) is part of the ongoing evaluation and will be reflected in the next revision of this report.

Applicable Standards/Guidelines

Standard/Guideline	Included In Report
Web Content Accessibility Guidelines 2.0	Level A (Yes) Level AA (Yes) Level AAA (No)
Web Content Accessibility Guidelines 2.1	Level A (Yes) Level AA (Yes) Level AAA (No)
Web Content Accessibility Guidelines 2.2	Level A (Yes) Level AA (Yes) Level AAA (No)

Terms

Supports

The functionality of the product has at least one method that meets the criterion without known defects or meets with equivalent facilitation.

Partially Supports

Some functionality of the product does not meet the criterion.

Does Not Support

The majority of product functionality does not meet the criterion.

Not Applicable

The criterion is not relevant to the product.

Not Evaluated

The product has not been evaluated against the criterion. This can only be used in WCAG Level AAA criteria.

WCAG 2.x Report

Table 1: Success Criteria, Level A

Criteria	Conformance Level	Remarks and Explanations
1.1.1 Non-text Content (Level A 2.0, 2.1, 2.2)	Supports	Texas A&M logos have text alternatives. Icon-only controls (send message, microphone, accent-character buttons) have accessible names. Decorative emoji and animations are hidden from assistive technology.
1.2.1 Audio-only and Video-only (Prerecorded) (Level A 2.0, 2.1, 2.2)	Supports	The product contains no prerecorded audio-only or video-only content. The AI tutor's spoken replies in Voice are generated on demand and also displayed as on-screen text.
1.2.2 Captions (Prerecorded) (Level A 2.0, 2.1, 2.2)	Not Applicable	The product contains no prerecorded synchronized media (video).
1.2.3 Audio Description or Media Alternative (Prerecorded) (Level A 2.0, 2.1, 2.2)	Not Applicable	The product contains no prerecorded video.
1.3.1 Info and Relationships (Level A 2.0, 2.1, 2.2)	Supports	Uses header, nav and main landmarks; a heading on every screen and headings for sections and scored feedback; programmatic labels on all form fields; native lists; and aria-pressed / aria-current for selected toggles, topics and navigation items.
1.3.2 Meaningful Sequence (Level A 2.0, 2.1, 2.2)	Supports	DOM reading order matches the visual order on desktop and mobile layouts.
1.3.3 Sensory Characteristics (Level A 2.0, 2.1, 2.2)	Supports	Instructions refer to labeled controls, not to shape, size, color or location alone.
1.4.1 Use of Color (Level A 2.0, 2.1, 2.2)	Supports	Quiz results mark correct and incorrect answers with symbols (✓ / ✗) and text, not color alone. Selected states use fill, border and font-weight changes, plus programmatic state. Word-count guidance is stated in text.

Criteria	Conformance Level	Remarks and Explanations
1.4.2 Audio Control (Level A 2.0, 2.1, 2.2)	Supports	Audio plays only after a user action (Voice tutor reply, playback of the user's own recording) and can be stopped with the same control or the native player controls.
2.1.1 Keyboard (Level A 2.0, 2.1, 2.2)	Supports	All functions work from the keyboard, including navigation, flashcard flip and rating, quiz answering, chat, essay entry, accent-character buttons, recording controls and the Voice microphone button. Verified by scripted keyboard tests.
2.1.2 No Keyboard Trap (Level A 2.0, 2.1, 2.2)	Supports	Focus can always be moved away from every component using standard keys.
2.1.4 Character Key Shortcuts (Level A 2.1, 2.2)	Not Applicable	The product does not implement single-character keyboard shortcuts.
2.2.1 Timing Adjustable (Level A 2.0, 2.1, 2.2)	Supports	The product has no time limits. The writing timer counts up for the learner's information only and never ends a task. The BTLPT "approximately 25 minutes" note is guidance only. University sign-on session length is governed by Texas A&M CAS, outside this product.
2.2.2 Pause, Stop, Hide (Level A 2.0, 2.1, 2.2)	Supports	Animation appears only while content loads or while the microphone is actively listening, and it stops automatically. There is no auto-updating or scrolling content.
2.3.1 Three Flashes or Below Threshold (Level A 2.0, 2.1, 2.2)	Supports	No content flashes.
2.4.1 Bypass Blocks (Level A 2.0, 2.1, 2.2)	Supports	A "Skip to main content" link is the first focusable element, and landmarks are provided.
2.4.2 Page Titled (Level A 2.0, 2.1, 2.2)	Supports	The page title is "Avanza Español — Spanish for Texas Teachers". Each screen also exposes a heading naming the active screen.
2.4.3 Focus Order (Level A 2.0, 2.1, 2.2)	Supports	Focus order is logical. When content is replaced, focus moves to the new content: the next quiz question, the "Next question" button after answering, and the next flashcard after rating.
2.4.4 Link Purpose (In Context) (Level A 2.0, 2.1, 2.2)	Supports	Links and link-styled buttons have descriptive text.
2.5.1 Pointer Gestures (Level A 2.1, 2.2)	Supports	No multipoint or path-based gestures are required.

Criteria	Conformance Level	Remarks and Explanations
2.5.2 Pointer Cancellation (Level A 2.1, 2.2)	Supports	Actions fire on the up-event (standard click).
2.5.3 Label in Name (Level A 2.1, 2.2)	Supports	Accessible names contain the visible label text.
2.5.4 Motion Actuation (Level A 2.1, 2.2)	Not Applicable	No functions are operated by device motion.
3.1.1 Language of Page (Level A 2.0, 2.1, 2.2)	Supports	The document language is set to English (lang="en").
3.2.1 On Focus (Level A 2.0, 2.1, 2.2)	Supports	Receiving focus does not trigger a change of context.
3.2.2 On Input (Level A 2.0, 2.1, 2.2)	Supports	Changing a setting (e.g., proficiency level) updates the content in place and does not trigger an unexpected change of context.
3.2.6 Consistent Help (Level A 2.2)	Not Applicable	The product does not currently provide a help mechanism that repeats across screens. Support contact information is provided through program training materials.
3.3.1 Error Identification (Level A 2.0, 2.1, 2.2)	Supports	Errors (e.g., microphone permission denied, grading failure, content load failure) are described in text and announced to assistive technology.
3.3.2 Labels or Instructions (Level A 2.0, 2.1, 2.2)	Supports	All inputs have visible labels or instructions and programmatic labels.
3.3.7 Redundant Entry (Level A 2.2)	Supports	Users are not asked to re-enter information they already provided. A teacher-written prompt is pre-filled when edited.
4.1.1 Parsing (Level A 2.0, 2.1)	Supports	For WCAG 2.0 and 2.1, this criterion is treated as always supported, per the WCAG 2.2 errata (4.1.1 is obsolete and removed in WCAG 2.2). The application is rendered by React, which produces well-formed markup.
4.1.2 Name, Role, Value (Level A 2.0, 2.1, 2.2)	Supports	Native controls are used throughout. The flashcard is exposed as a button with keyboard support. Toggle and selection states are exposed with aria-pressed / aria-current.

Table 2: Success Criteria, Level AA

Criteria	Conformance Level	Remarks and Explanations
1.2.4 Captions (Live) (Level AA 2.0, 2.1, 2.2)	Not Applicable	The product contains no live synchronized media.
1.2.5 Audio Description (Prerecorded) (Level AA 2.0, 2.1, 2.2)	Not Applicable	The product contains no prerecorded video.
1.3.4 Orientation (Level AA 2.1, 2.2)	Supports	Content works in portrait and landscape and is not locked to either.
1.3.5 Identify Input Purpose (Level AA 2.1, 2.2)	Not Applicable	The product has no fields that collect information about the user. Sign-in is handled by Texas A&M CAS.
1.4.3 Contrast (Minimum) (Level AA 2.0, 2.1, 2.2)	Supports	All text meets 4.5:1 (large text 3:1). Automated contrast checks report no failures on any screen. Disabled controls and logos are exempt.
1.4.4 Resize Text (Level AA 2.0, 2.1, 2.2)	Supports	Text can be zoomed to 200% using browser zoom without loss of content or function. The layout switches to a single-column mobile layout.
1.4.5 Images of Text (Level AA 2.0, 2.1, 2.2)	Supports	No images of text are used, other than the Texas A&M logo (a logotype, which is exempt).
1.4.10 Reflow (Level AA 2.1, 2.2)	Supports	Verified at 320 CSS px width: no two-dimensional scrolling, and all functions (including the interface language switch) remain available. At narrow widths the navigation becomes a horizontally scrollable tab strip.
1.4.11 Non-text Contrast (Level AA 2.1, 2.2)	Supports	Input borders, control borders and the 3px focus indicator meet 3:1 against adjacent colors.
1.4.12 Text Spacing (Level AA 2.1, 2.2)	Supports	Tested with the WCAG text-spacing overrides (line height 1.5, letter spacing 0.12em, word spacing 0.16em, paragraph spacing 2em). No content was clipped or lost.
1.4.13 Content on Hover or Focus (Level AA 2.1, 2.2)	Supports	No custom hover or focus pop-ups are used. The only tooltips are native browser tooltips (title attribute).
2.4.5 Multiple Ways (Level AA 2.0, 2.1, 2.2)	Not Applicable	The product is a single-page application. Every screen is reachable directly from the persistent navigation.
2.4.6 Headings and Labels (Level AA 2.0, 2.1, 2.2)	Supports	Headings and labels describe their topic or purpose.
2.4.7 Focus Visible (Level AA 2.0, 2.1, 2.2)	Supports	A 3px high-contrast focus outline is shown on all focusable elements during keyboard navigation.
2.4.11 Focus Not Obscured (Minimum) (Level AA 2.2)	Supports	No sticky or overlay content covers the focused element.

Criteria	Conformance Level	Remarks and Explanations
2.5.7 Dragging Movements (Level AA 2.2)	Not Applicable	No dragging movements are used.
2.5.8 Target Size (Minimum) (Level AA 2.2)	Supports	Interactive targets are at least 24×24 CSS px or have enough spacing.
3.1.2 Language of Parts (Level AA 2.0, 2.1, 2.2)	Partially Supports	Spanish learning content is marked lang="es": tutor messages, quiz sentences, options, passages and feedback, flashcard words and examples, task prompts, transcriptions and essays. The sidebar and header follow the selected interface language. Exceptions: (1) when the interface language is set to Español, some interface labels within screens are not marked as Spanish; (2) mixed-language topic names (e.g., "Casos legales de Texas") and free-text learner input (which may be in either language) are not marked.
3.2.3 Consistent Navigation (Level AA 2.0, 2.1, 2.2)	Supports	The navigation is persistent and in the same order on every screen.
3.2.4 Consistent Identification (Level AA 2.0, 2.1, 2.2)	Supports	Components with the same function are identified consistently.
3.3.3 Error Suggestion (Level AA 2.0, 2.1, 2.2)	Supports	Error messages suggest corrections (e.g., allow microphone access, try again, minimum word count).
3.3.4 Error Prevention (Legal, Financial, Data) (Level AA 2.0, 2.1, 2.2)	Not Applicable	The product has no legal commitments, financial transactions, or modification or deletion of user-controllable stored data.
3.3.8 Accessible Authentication (Minimum) (Level AA 2.2)	Supports	Authentication uses Texas A&M NetID single sign-on (CAS), which supports password managers and paste. The product adds no cognitive function test.
4.1.3 Status Messages (Level AA 2.1, 2.2)	Supports	Loading, grading, quiz feedback, Voice status, copy confirmations and new chat messages are announced through status, log and alert live regions without moving focus.

Table 3: Success Criteria, Level AAA

Not Evaluated.

Remediation Plan

Item	Criterion	Plan and Target Date
Mark Spanish interface labels within screens when the interface language is set to Español, and mark mixed-language topic names	3.1.2	Target: December 31, 2026
Manual screen-reader verification (VoiceOver, NVDA) and publication of a revised ACR	All	Target: December 31, 2026
Add a consistent in-app help/contact link for accessibility support	3.2.6 (best practice)	Target: December 31, 2026

Accessibility issues identified by users can be reported to the contacts above. They will be addressed through remediation or a timely, comparable alternative, in coordination with Texas A&M Disability Resources and University Human Resources as appropriate.

Legal Disclaimer

This Accessibility Conformance Report describes the conformance of Avanza Español v1.0 (Beta) as evaluated on the report date. It was prepared by the product's development team at Texas A&M University (CRDLLA) in good faith, based on the evaluation methods listed above. Later versions of the product may differ, and this report will be updated as the product changes. "VPAT" is a registered service mark of the Information Technology Industry Council (ITI).
